

Fishing Hotspot Chart

Hotspots increase rarity of fish caught. The colored bars represents the share of rarity found in each pool before modifiers. With the right gear and bait you can get Rare and above in Secret Hotspots.

Water Depth for Bite Time

Very Shallow ~25 seconds

Shallow ~15 seconds

Deep ~10 seconds

The number of seconds it takes to get a bite without bait. Using bait will cut these times in half. Always use bait! Bites in Saltwater are a little faster vs Freshwater. Values are ranges +/- 5 seconds.
